SUMMARY

I'm an AI and software developer passionate about building intelligent solutions that make education more inclusive and accessible for all learners. With experience in web, mobile, and VR development – and a strong foundation in Python, Java, and C – I've created numerous projects, including an AI learning platform for students with special needs. Beyond coding, I'm deeply involved in leadership and community work as a founder of LIONS Club Atlantis, where I've led initiatives promoting youth empowerment and innovation.

WORK EXPERIENCE

Software Development Intern – SMART BUSINESS SOLUTION

Jan 2023 - Feb 2023

- Contributed to the development of a business management web application using PHP, MySQL, and Bootstrap.
- Created dynamic dashboards for client analytics and reporting.
